SUMMARY

Senior Frontend Engineer with 7+ years building and leading production web and mobile interfaces at scale. Deep expertise in React, Next.js, and TypeScript — shipped a Next.js 13 to 15 upgrade, large-scale performance optimisations, i18n, and multi-tenant SaaS portals at Como (acquired by Global Payments, NYSE: GPN). Strong command of component architecture, state management, accessibility, CI/CD (Continuous Integration / Continuous Deployment), and cross-platform delivery including React Native. Also shipped FreshCheck AI and PixHaul as independent, production-grade solo projects.

EXPERIENCE

Senior Software Engineer *Sep 2025 - Present*

Como - acquired by Global Payments (NYSE: GPN) | Dubai, UAE | Loyalty SaaS

- Led frontend delivery of the React Native mobile app and Next.js customer portal — sole owner end-to-end: architecture decisions, Agile sprint planning with Scrum ceremonies, code review, and App Store / Google Play deployments.
- Optimised per-page bundle sizes across the Next.js customer portal, cutting average page weight by approximately 55% and improving Largest Contentful Paint (LCP) across all major routes.
- Upgraded the customer portal from Next.js 13 to 15 (App Router + Turbopack), reducing cold build time by approximately 40% and setting a maintainable, modern baseline for the frontend team.
- Architected a multi-tenant WhatsApp campaign service — built deep-link routing that lands users on specific in-app screens across 12+ business accounts, handling OTP delivery, image campaigns, and promotional offers.
- Built a B2B integration layer exposing Como's loyalty engine to third-party partner apps via RESTful API — opened a new revenue channel without requiring partners to onboard to the main product.
- Designed event-driven background job pipelines using RabbitMQ — async queue workers with retry logic and response caching kept API latency within SLA under peak load.

Stack: React Native, Next.js 15, TypeScript, Tailwind CSS, App Router, Turbopack, C#/.NET, RabbitMQ, Docker, Kubernetes

Software Engineer *Dec 2022 - Sep 2025*

Como - acquired by Global Payments (NYSE: GPN) | Dubai, UAE | Promoted to Senior Software Engineer, Sep 2025

- Built the merchant onboarding platform from scratch using Next.js, Tailwind CSS, and C# — replaced a manual days-long setup process, reducing new business onboarding time to under an hour.
- Added i18n to the customer portal (JavaScript / Next.js web app) via i18next with server-fetched translation keys — eliminated app store resubmissions for copy changes and enabled same-day text updates across 5+ locales.
- Introduced React Hook Form across all mobile form screens, cutting form boilerplate by approximately 60%, halving time-to-ship new screens, and standardising validation patterns app-wide.
- Upgraded React Native from version 0.66 to 0.77 — migrated entire codebase from class to functional components, updated native module bridges, resolved breaking changes across iOS and Android, and unblocked the full modern hooks ecosystem.
- Re-architected the mobile product catalog to support unlimited nesting depth via recursive rendering, replacing a fixed 2-level structure — unblocked restaurant and retail clients with complex multi-tier menu hierarchies.
- Implemented push notifications with deep linking from scratch using React Native Push Notification and react-navigation — increased 7-day user reactivation rate by approximately 25%.

Stack: Next.js, React, TypeScript, JavaScript, Tailwind CSS, i18next, React Hook Form, React Native, C#/.NET

Software Engineer *Jun 2019 - Nov 2022*

Invygo Tech LLC | Dubai, UAE | Car Subscription Platform, Series A (UAE and KSA)

- Co-engineered the full Invygo React Native app rebrand from scratch in a 3-person team — redesigned component architecture and UI end-to-end, shipping a smooth cross-platform experience to the App Store and Google Play.

- Built the in-app invoices and payments screen with Stripe integration — users could view and settle subscription costs, Salik charges, and traffic fines on iOS and Android, reducing support contacts by approximately 90%.
- Built an operations dashboard giving the customer-service team a full booking lifecycle view (request to accepted to in progress to return to completed) — cut average support resolution time by approximately 35%.
- Integrated Customer.io (CRM), Freshdesk (ticketing), ZIWO (calling), and Intercom (live chat) — unified all customer-facing communication tooling behind a single React Native mobile surface.

Stack: React Native, JavaScript, TypeScript, React, Stripe, Customer.io, Intercom, Node.js

SIDE PROJECTS

FreshCheck AI (2025, Solo) - Production React Native (Expo) app shipped independently to App Store and Google Play. AI-powered grocery expiry tracker: photographs groceries, reads 12 date formats via Gemini AI, sends tiered push notifications, and suggests recipes for at-risk ingredients. Integrated RevenueCat for in-app purchases and Supabase for auth and storage. 46+ live users, 1,200+ items recognised.

freshcheck.shop • [App Store](#) • [Google Play](#)

PixHaul (2024, Solo) - Suite of 11 client-side browser utilities (image conversion, PDF editing, QR generation). Zero server uploads, no sign-up, free forever. Stack: Next.js, TypeScript, Web APIs, Canvas API.

pixhaul.com

SKILLS

Frontend: React, Next.js 15 (App Router, Turbopack), TypeScript, JavaScript, Tailwind CSS, shadcn/ui, HTML5, CSS3

State & Data: React Hook Form, TanStack Query, Zustand, i18next, React Context, REST, GraphQL

Mobile: React Native (0.60 - 0.77), Expo (managed and bare workflow), iOS, Android, Deep Linking, Push Notifications, Stripe, Apple Pay

Performance: Bundle Optimisation, LCP / Core Web Vitals, Code Splitting, Tree Shaking, Lazy Loading, SSR, SSG

Languages: TypeScript, JavaScript, C#

Backend: Node.js, Hono.js, .NET / C#, PostgreSQL, RabbitMQ, RESTful APIs

Architecture: Component Architecture, System Design, Scalable Frontend Architecture, Micro-frontends, Technical Leadership

AI / LLM: Claude API, Gemini, OpenAI, MCP Servers, Agentic Workflows

Testing: Jest, Cypress, React Testing Library, Unit Testing, Integration Testing, E2E Testing

DevOps / CI: GitHub Actions, Codemagic, Bitrise, Jenkins, Docker, Vercel, AWS (S3, EC2, Lambda)

Methodologies: Agile, Scrum, Code Review, Technical Mentorship

EDUCATION

B.Tech, Computer Science & Engineering 2015 - 2019

Indian Institute of Technology (IIT), Ropar
