SUMMARY

Senior React Native Engineer with 7+ years building and leading production iOS and Android applications. Currently sole mobile owner at Como (acquired by Global Payments, NYSE: GPN) — driving architecture, delivery, OTA updates, CI/CD (Continuous Integration / Continuous Deployment), and team mentorship end-to-end. Shipped FreshCheck AI solo from zero to App Store and Google Play. Deep expertise across the full React Native stack: TypeScript, Expo, native modules, Hermes engine, CodePush, deep linking, push notifications, and payment integrations including Apple Pay and Stripe.

EXPERIENCE

Senior Software Engineer *Sep 2025 - Present*

Como - acquired by Global Payments (NYSE: GPN) | Dubai, UAE | Loyalty SaaS

- Sole mobile owner — React Native iOS and Android app end-to-end: architecture decisions, Agile sprint planning with Scrum ceremonies, requirement gathering, solutioning for junior engineers, code review, and App Store / Google Play deployments.
- Led React Native performance optimisation initiative — profiled and resolved JS thread bottlenecks, reduced TTI (Time to Interactive) and improved frame rate consistency across low-end Android devices.
- Managed OTA update strategy via CodePush, enabling hotfix delivery to production users without app store resubmission cycles.
- Architected a multi-tenant WhatsApp campaign service in C# via Unifonic - supports OTP delivery, image campaigns, and promotional offers with deep links routing users to specific in-app screens across 12+ business accounts.
- Designed event-driven background job pipelines using RabbitMQ - async queue workers with retry logic and response caching kept API latency within SLA under peak load.

Stack: React Native, TypeScript, Expo, CodePush, iOS, Android, C#/.NET, RabbitMQ, Docker, Kubernetes

Software Engineer *Dec 2022 - Sep 2025*

Como - acquired by Global Payments (NYSE: GPN) | Dubai, UAE | Promoted to Senior Software Engineer, Sep 2025

- Owned the full React Native upgrade from version 0.66 to 0.77 (bare workflow) - migrated entire codebase from class to functional components, updated native modules and third-party bridges, resolved breaking changes across iOS and Android targets, and unblocked the full modern hooks ecosystem.
- Introduced React Hook Form across all mobile form screens, cutting form boilerplate by approximately 60%, halving time-to-ship new screens, and standardising validation patterns across the app.
- Implemented push notifications with deep linking from scratch using React Native Push Notification and react-navigation - enabled campaigns to route users directly to deeply nested screens, increasing 7-day reactivation rate by approximately 25%.
- Re-architected the mobile catalog to support unlimited nesting depth via recursive rendering, replacing a fixed 2-level structure - unblocked restaurant and retail clients with complex multi-tier menu hierarchies.
- Built the merchant onboarding platform from scratch (Next.js + Tailwind CSS + C#) and added i18n to the customer portal (JavaScript / Next.js web app) via i18next - eliminated app store resubmissions for copy changes across 5+ locales.

Stack: React Native 0.77, TypeScript, Expo, iOS, Android, React Hook Form, i18next, Next.js, C#/.NET

React Native Engineer *Jun 2019 - Nov 2022*

Invygo Tech LLC | Dubai, UAE | Car Subscription Platform, Series A (UAE and KSA)

- Co-engineered the full Invygo React Native app rebrand from scratch in a 3-person team - redesigned architecture and UI end-to-end, shipping a smooth modern cross-platform experience to the App Store and Google Play.
- Built the in-app invoices and payments screen with Stripe integration - users could settle subscription costs, Salik charges, and traffic fines directly on iOS and Android, reducing support contacts by approximately 90%.

- Integrated push notifications and an operations dashboard giving the CS team a full booking lifecycle view (request to accepted to in progress to return to completed) - cut average support resolution time by approximately 35%.
- Integrated Customer.io (CRM), Freshdesk (ticketing), ZIWO (calling), and Intercom (live chat) - unified all customer-facing communication tooling behind a single React Native mobile surface.

Stack: React Native, JavaScript, TypeScript, iOS, Android, Stripe, Customer.io, Intercom, Node.js

MOBILE PROJECTS

FreshCheck AI (2025, Solo) - Production React Native (Expo) app shipped independently to App Store and Google Play. AI-powered grocery expiry tracker: photographs groceries, reads 12 date formats via Gemini AI, sends tiered push notifications, and suggests recipes for at-risk ingredients. Integrated RevenueCat for in-app purchases and Supabase for auth and storage. 46+ live users, 1,200+ items recognised.

freshcheck.shop • [App Store](#) • [Google Play](#)

PixHaul (2024, Solo) - Suite of 11 client-side browser utilities. Stack: Next.js, TypeScript, Web APIs.

pixhaul.com

SKILLS

Mobile: React Native (0.60 - 0.77), Expo (managed and bare workflow), iOS, Android, TypeScript, JavaScript, Hermes Engine, Metro Bundler, Native Modules, CodePush, OTA Updates, Deep Linking, Push Notifications, Apple Pay, Stripe, Capacitor

Languages: TypeScript, JavaScript, C#

Frontend: React, Next.js 15, Tailwind CSS, shadcn/ui

Backend: Node.js, Hono.js, .NET / C#, PostgreSQL, RabbitMQ, RESTful APIs, GraphQL

Architecture: System Design, Scalable Architecture, Microservices, Distributed Systems, Technical Leadership

AI / LLM: Claude API, Gemini, OpenAI, MCP Servers, Agentic Workflows

Testing: Jest, Cypress, React Testing Library, Unit Testing, Integration Testing, E2E Testing

DevOps / CI: GitHub Actions, Codemagic, Bitrise, Jenkins, Docker, Kubernetes, CodePush

Cloud: AWS (S3, EC2, Lambda), Supabase, Vercel

Methodologies: Agile, Scrum, Code Review, Technical Mentorship

EDUCATION

B.Tech, Computer Science & Engineering 2015 - 2019

Indian Institute of Technology (IIT), Ropar
