SUMMARY

Senior Full-Stack & Mobile Engineer with 7+ years of experience building scalable SaaS, AI-powered, and multi-tenant applications across mobile and web. Specialized in React Native, Next.js, TypeScript, and C#/.NET with strong experience in system design, scalable architecture, performance optimization, CI/CD (Continuous Integration / Continuous Deployment), cloud infrastructure, and LLM-powered workflows. Proven track record shipping production systems at scale for global platforms including Como (acquired by Global Payments, NYSE: GPN).

EXPERIENCE

Senior Software Engineer *Sep 2025 - Present*

Como - acquired by Global Payments (NYSE: GPN) | Dubai, UAE | Loyalty SaaS

- Sole ownership of the React Native mobile app end-to-end - requirement gathering, architecture decisions, solutioning for junior engineers, code review, and production deployments; leading delivery across Agile sprints with Scrum ceremonies.
- Optimised per-page bundle sizes across the customer portal, cutting average page weight by approximately 55% and improving LCP across all major routes.
- Upgraded the customer portal from Next.js 13 to 15 (App Router + Turbopack), reducing cold build time by approximately 40% and setting a maintainable baseline for the team.
- Architected a multi-tenant WhatsApp campaign service in C# via Unifonic - supports OTP delivery, image campaigns, and promotional offers with deep links across 12+ business accounts.
- Built a C# integration layer exposing Como's loyalty engine to third-party platforms - partner apps can query user points, credits, purchases, and gifts via RESTful API without onboarding to the main product, opening a new B2B revenue channel.
- Designed event-driven background job pipelines in C# using RabbitMQ message queues for campaign dispatch and loyalty event processing - async queue workers with retry logic and response caching decoupled service dependencies and kept API latency within SLA under peak load.

Stack: React Native, Next.js 15, TypeScript, C#/.NET, RabbitMQ, Unifonic, Docker, Kubernetes

Software Engineer *Dec 2022 - Sep 2025*

Como - acquired by Global Payments (NYSE: GPN) | Dubai, UAE | Promoted to Senior Software Engineer, Sep 2025

- Upgraded React Native from version 0.66 to 0.77 - migrated entire codebase from class to functional components, eliminating lifecycle-related bug classes and unblocking the full modern hooks ecosystem.
- Introduced React Hook Form across the mobile app, cutting form boilerplate by approximately 60% and halving the time to ship new form screens.
- Added i18n to the customer portal (JavaScript / Next.js web app) via i18next with server-fetched translation keys - eliminated app store resubmissions for copy changes and enabled same-day text updates across 5+ locales.
- Built the merchant onboarding platform from scratch (Next.js + Tailwind CSS + C#) - reduced business setup time from days to under an hour.
- Re-architected the mobile catalog to support unlimited nesting depth, replacing a fixed 2-level structure - unblocked restaurant and retail clients with complex multi-tier menu hierarchies.
- Implemented push notifications with deep linking from scratch - increased 7-day reactivation rate by approximately 25%.

Stack: React Native, Next.js, TypeScript, i18next, React Hook Form, Tailwind CSS, C#/.NET

Software Engineer *Jun 2019 - Nov 2022*

Invygo Tech LLC | Dubai, UAE | Car Subscription Platform, Series A (UAE and KSA)

- Co-engineered the full Invygo app rebrand from scratch in a 3-person team - redesigned architecture and UI end-to-end, shipping to the App Store and Google Play.
- Built an operations dashboard giving the CS team a full booking lifecycle view (request to accepted to in progress to return to completed) - cut average support resolution time by approximately 35%.

- Integrated Customer.io as the CRM layer - enabled segmented drip campaigns and A/B testing across multiple channels, improving retention campaign engagement.
- Integrated Freshdesk for the support team, replacing ad-hoc email tracking with structured ticketing and reducing manual triage overhead by approximately 30%.
- Integrated ZIWO calling suite into the CS workflow, consolidating outbound call tooling and reducing per-call setup time.
- Integrated Intercom live chat, adding a direct in-app support channel and reducing first-contact response time.
- Built the in-app invoices and payments screen - users could settle subscription costs, Salik charges, and traffic fines directly in the app, reducing support contacts by approximately 90%.

Stack: React Native, TypeScript, Node.js, Customer.io, Freshdesk, ZIWO, Intercom, Stripe

SIDE PROJECTS

FreshCheck AI (2025, Solo) - AI mobile app that photographs groceries and reads expiry dates across 12 date formats, sends tiered reminders, and suggests recipes for at-risk ingredients. 46+ live users, 1,200+ items recognised. Stack: React Native, Expo, TypeScript, Supabase, Gemini AI, RevenueCat.

freshcheck.shop • [App Store](#) • [Google Play](#)

PixHaul (2024, Solo) - Suite of 11 client-side browser utilities (image conversion, PDF editing, QR generation). Zero server uploads, no sign-up, free forever. Stack: Next.js, TypeScript, Web APIs, Canvas API.

pixhaul.com

SKILLS

Languages: TypeScript, JavaScript, C#

Frontend: React, Next.js 15, Tailwind CSS, shadcn/ui

Mobile: React Native, Expo, Apple Pay, Capacitor, Push Notifications, Deep Linking

Backend: Node.js, Hono.js, .NET / C#, PostgreSQL, RabbitMQ, RESTful APIs, GraphQL

Architecture: System Design, Scalable Architecture, Microservices, Distributed Systems, Software Architecture, Technical Leadership

AI / LLM: Claude API, Gemini, OpenAI, MCP Servers, Tool Use, Agentic Workflows

Testing: Jest, Cypress, React Testing Library, Unit Testing, Integration Testing, E2E Testing

DevOps / CI: GitHub Actions, Jenkins, Docker, Kubernetes, Codemagic, Bitrise, CodePush

Cloud: AWS (S3, EC2, Lambda), Supabase, Vercel

Methodologies: Agile, Scrum, Code Review, Technical Mentorship

EDUCATION

B.Tech, Computer Science & Engineering 2015 - 2019

Indian Institute of Technology (IIT), Ropar
