

Alok Kiran

Senior Frontend Engineer

Dubai, UAE • +971 551053676 • alokkiran777@gmail.com • linkedin.com/in/alokkiran • github.com/alok-kiran

SUMMARY

Senior Frontend Engineer with 7+ years building scalable, high-performance web and mobile interfaces. Deep expertise in React, TypeScript, Next.js, HTML, and CSS — with a strong track record in performance optimisation, responsive and mobile-first design, RESTful API integration, and shipping AI-driven, data-heavy interfaces to production. Currently at Como (acquired by Global Payments, NYSE: GPN), delivering frontend architecture across a multi-tenant SaaS platform at scale. Independently shipped FreshCheck AI, a production app combining real-time AI inference with a consumer-grade mobile interface.

EXPERIENCE

Senior Software Engineer *Sep 2025 - Present*

Como - acquired by Global Payments (NYSE: GPN) | Dubai, UAE | Loyalty SaaS

- Drove React Native mobile app and Next.js customer portal frontend delivery — architecture decisions, Agile sprint planning with Scrum ceremonies, code review, and production deployments across web and mobile.
- Optimised per-page bundle sizes across the Next.js customer portal — cut average page weight by approximately 55% and improved Largest Contentful Paint (LCP) across all major routes using code splitting, lazy loading, and tree shaking.
- Upgraded the customer portal from Next.js 13 to 15 (App Router + Turbopack), reducing cold build time by approximately 40%, improving developer experience, and establishing a scalable frontend architecture baseline for the team.
- Built responsive, data-driven campaign management interfaces in React and TypeScript — translating product and design requirements into clean, maintainable UI with cross-browser compatibility across all major browsers.
- Architected deep-link routing for a multi-tenant WhatsApp campaign service — surfaces contextual UI states in-app from external triggers across 12+ business accounts, integrating asynchronous backend event streams into the frontend layer.
- Integrated a C# RESTful API layer into the frontend, enabling third-party partner applications to query and display loyalty data in real time without onboarding to the main product.

Stack: React, Next.js 15, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, App Router, Turbopack, RESTful APIs, React Native, Docker

Software Engineer *Dec 2022 - Sep 2025*

Como - acquired by Global Payments (NYSE: GPN) | Dubai, UAE | Promoted to Senior Software Engineer, Sep 2025

- Built the merchant onboarding platform from scratch using Next.js, Tailwind CSS, and a C# backend — translated UX designs into a fully responsive, multi-step interface that reduced business setup time from days to under an hour.
- Added i18n to the customer portal (JavaScript / Next.js web app) via i18next with server-fetched translation keys — built a locale-aware frontend rendering layer supporting 5+ languages, enabling same-day text updates without redeployment.
- Introduced React Hook Form across all form screens, standardising validation patterns, cutting boilerplate by approximately 60%, and halving the time to ship new UI screens.
- Upgraded React Native from version 0.66 to 0.77 — migrated the full codebase to functional components, resolved breaking changes across iOS and Android, and adopted the modern React hooks ecosystem across the entire UI layer.
- Re-architected the product catalog UI to support unlimited nesting depth via recursive React component rendering, replacing a fixed 2-level structure — unblocked complex multi-tier menu hierarchies for restaurant and retail clients.
- Implemented push notification UI and deep linking from scratch — built the frontend routing layer to land users on deeply nested app screens from external triggers, increasing 7-day reactivation rate by approximately 25%.

Stack: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, React Hook Form, i18next, React Native, RESTful APIs, C#/.NET

Software Engineer *Jun 2019 - Nov 2022*

Invygo Tech LLC | Dubai, UAE | Car Subscription Platform, Series A (UAE and KSA)

- Co-engineered the full Invygo app UI rebrand from scratch in a 3-person team — redesigned component architecture and visual design end-to-end, delivering a mobile-first, responsive experience to App Store and Google Play.

- Built a real-time operations dashboard for the customer-service team — a data-heavy React interface giving full lifecycle visibility across all active bookings (request to accepted to in progress to return to completed), cutting support resolution time by approximately 35%.
- Built the in-app invoices and payments UI with Stripe API integration — designed and implemented the end-to-end payments interface on iOS and Android, reducing support contacts by approximately 90%.
- Integrated Customer.io, Freshdesk, ZIWO, and Intercom into the frontend — consumed multiple RESTful APIs and asynchronous data streams to surface CRM, ticketing, calling, and live-chat tooling inside a single mobile interface.

Stack: React Native, JavaScript, TypeScript, HTML, CSS, RESTful APIs, Stripe, Customer.io, Intercom, Node.js

SIDE PROJECTS

FreshCheck AI (2025, Solo) - AI-driven consumer mobile interface shipped independently to App Store and Google Play. Built on React Native (Expo) with real-time Gemini AI inference — photographs groceries, classifies 12 date formats, renders expiry timelines, and surfaces recipe recommendations for at-risk items. Integrated RevenueCat (in-app purchases) and Supabase (auth, storage). 46+ live users, 1,200+ items recognised.

freshcheck.shop • [App Store](#) • [Google Play](#)

PixHaul (2024, Solo) - Suite of 11 client-side browser utilities (image conversion, PDF editing, QR generation, Canvas-based image processing). Built entirely in Next.js and TypeScript using Web APIs and Canvas API — zero server uploads, no sign-up, fully responsive across desktop and mobile browsers.

pixhaul.com

SKILLS

Frontend Core: JavaScript (ES2022+), TypeScript, HTML5, CSS3, React 19, Next.js 15 (App Router, SSR, SSG), Tailwind CSS, shadcn/ui

Performance: Bundle Optimisation, Code Splitting, Lazy Loading, Tree Shaking, LCP / Core Web Vitals, Lighthouse, Turbopack

UI Patterns: Responsive Design, Mobile-First, Component Architecture, Accessibility, i18n, React Hook Form, TanStack Query

API Integration: RESTful APIs, GraphQL, Async Data Handling, WebSockets, Fetch / Axios

Mobile: React Native (0.60 - 0.77), Expo (managed and bare workflow), iOS, Android, Deep Linking, Push Notifications

AI / LLM Interfaces: Claude API, Gemini, OpenAI, MCP Servers, Agentic Workflows, AI-driven UI integration

Testing: Jest, Cypress, React Testing Library, Unit Testing, Integration Testing, E2E Testing

DevOps / CI: Git, GitHub Actions, Vercel, Docker, Codemagic, Jenkins

Backend: Node.js, Hono.js, .NET / C#, PostgreSQL, RESTful API Design

Methodologies: Agile, Scrum, Code Review, Technical Mentorship

EDUCATION

B.Tech, Computer Science & Engineering 2015 - 2019

Indian Institute of Technology (IIT), Ropar
